THINKFUL

Thinkful Inc.
55 Prospect Street
Suite 201
Brooklyn, NY 11201

May 20, 2020

To Whom It May Concern:

This letter is being written on behalf of student Sajith Gowthaman and his performance in the Thinkful Data Science Flexible course.

Sajith's enrollment with Thinkful formally began on December 30, 2019 and ended May 20, 2020. While enrolled, Sajith completed all necessary modules, including the following:
- Python for Data Scientists
- SQL Foundations
- Supervised and Unsupervised Machine Learning
- Specialization in Natural Language Processing

Thinkful's mission is to provide ambitious students everywhere with the skills and competencies needed to achieve and succeed in high-growth tech careers. To accomplish that, Thinkful provides one-on-one learning through its network of industry experts, hiring partners, and online platform to deliver a structured and flexible education. Thinkful programs do not require students to complete general education courses as part of the curriculum. The goal of Thinkful programs is not licensure but to equip students with a competitive skill set for the tech industry.

Sajith was respectful and professional in all of his interactions with mentors, support staff, and students. He exhibited advanced problem-solving and troubleshooting from his first day of enrollment. He also remained engaged throughout the program which attributed to his success in skill acquisition. Sajith has exhibited leadership and tenacity throughout the course that we know will carry him well throughout his professional career. We believe he will make great contributions to the field of data science and look forward to his success.

Thank you very much for your time. Please let me know if you have additional questions or concerns.

Sincerely,

Alexandra Taylor
Academic Success Manager
